

At Ag USA we believe that strong healthy high-yield crops can be grown without using large amounts of chemical based pesticides. That is why we have introduced our own nature friendly CleanGreen I.F.C that is made from all natural plant oils. I.F.C. is extremely effective at helping to suppress insects and fungus. The extracts are non-persistent, biodegradable decomposing rapidly in the environment.

We believe that by using a nature friendly product to help suppress pests that we can help protect our environment by lowering the use of hazardous chemicals found in today's pesticides and provide safe residue-free produce.

**Help to Protect the Land and Our Children by Using CleanGreen® I.F.C. to Safely & Naturally Enhance Plant Health!**

## **I.F.C. Can Help Keep Crops Pest & Fungus Free.**

The bottom line is that CleanGreen I.F.C. is an excellent product that does a great job at helping to discourage both insects and fungus'. It's superior versatility makes it an ideal product to also enhance plant health.

## Chemical Adjuvant

**A Safe Chemical-Free  
Solution!**

**Phone: (770) 251-0815**

**I.F.C.** is a Powerful Carcinogen-Free Adjuvant that Helps Suppress Soft Bodied Insects & Fungus Safely & Effectively.

Our Specialized Formula Can Help Protect and Save Your Crop From Disastrous Infectious Pests!

**Protect Your Investment with I.F.C.**

**I.F.C. Can Save the Average Farmer Money by Eliminating or Lowering Expensive & Harmful Chemical Pesticide Use.**

Farmers are plagued with insects that can devastate crops in a matter of days. Fungi are also a great nuisance and can cause just as much, if not more, damage. Chemical pesticides are now used by practically all farmers to control a variety of pest organisms.

I.F.C. helps raise chemical efficiency allowing the grower to use less! I.F.C. also works to boost the plants immune system and overall health. This in turn reduces the need for chemical inputs to protect crops from pests. A healthy plant is less prone to becoming the victim of crop destroying insects and fungus.

**It Doesn't Get Any Better Than This**
