

SAS used as Insect and Fungal Control today is the most advanced adjuvant available on the market.

Not only does SAS increase chemical effectiveness, but it also does so meeting stringent standards for being a clean OMRI certified product.

The ability to carry spray material more efficiently with higher absorption rates than the competition plus to be OMRI certified has propelled SAS I.F.C. to it's place as the best adjuvant on the market today!

SAS

used as

I.F.C.

Adjuvant

For Organic Use

Growers and commercial applicators all across the United States are buying and using one of our top selling products: SAS used as I.F.C. because it works. Studies, intensive trials and user feedback have all concluded that SAS Adjuvant boosts the effectiveness of everything it is applied with - chemical and/or foliar fertilizer. In fact, most feedback suggests that we are able to carry chemical at the manufacturer's lowest recommended rate and still have excellent results! Also, foliar fertilizer applications are now showing great improvements in crop production with SAS used as I.F.C.

**Use less chemical
and still have
better results!**

"I used I.F.C. and the lowest recommended rate of herbicide and have clean fields. My neighbors have been spraying full rates of herbicide without I.F.C. and their fields are weedy. I.F.C. is hands down the best solution for hard to kill weeds!"

-GA Cotton Grower

**Effective
Affordable
Easy to Use
Rainfast in Minutes**

**SAS as I.F.C.
is the last adjuvant
you will ever need to
buy; it's that good!!!**

***"Used I.F.C. with my
soybean sprays - bugs
gone, fungus gone, fields
are clean, yields are up!"***

-MN Soybean Grower

General Use Directions

SAS is a natural non-ionic adjuvant designed to improve the performance of fertilizers, pesticides and other agricultural products by increasing their ability to be carried into plant tissue effectively.

Recommended Application Rates

Mix SAS at a rate of 1 oz. per gallon of solution. A rate of up to 2 oz. per gallon may be used to maximize effectiveness.

Compatible with most fertilizers, pesticides, and other spray materials.
